Future Waterproofing

Solutions For The

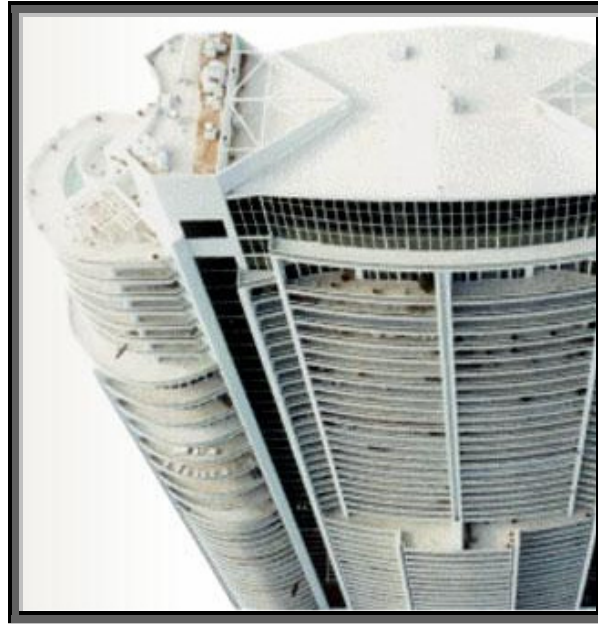

Entire Building

Envelope

Now

Installing industry-leading waterproofing systems for virtually any building surface: roofs, walls, decks, patios,

below-grade and Green Roof applications.

We apply a multi-layer coating creating a seamless envelope to repel moisture, resist environmental challenges, and deliver a lifetime of dependable service with only minimal maintenance.

CDS Inc. applied waterproofing system comes in a spectacular range of colors and textures. They're highly cost-effective and can be applied over nearly any surface or material, making

it ideal for new construction as well as upgrades from existing systems.

Our experienced professionals are here to help meet your needs with proven solutions.

All our installed waterproofing solutions are utilizing manufacture-warranted systems implemented efficiently without interrupting regular flow of daily business.

**Emissivity: radiates over 90% of its stored heat energy away from itself keeping which is equally important for having a cool roof. The cool roof system can save you money on your cooling energy and can extend the life of your roof.*

**High Albedo: reflects or scatters over 78% of the amount of sunlight energy that is radiated on it. The DOE considers anything over 50% good and our solution has one of the highest in the industry*

Among the many waterproofing projects that the Company handles are: roofs, patios, driveways, pool decks, stucco walls and certain water features.

CDSI can handle any size project, from a few thousand square feet rooftops to multi-thousand square feet commercial projects. CDSI warranty varies based on the installation type offering the same high quality workmanship for all projects.

Call **703-390-0580** and one of our estimators will gladly take you through the process and will give you a quick, free, no obligation estimate.
